Professional Summary

Cloud-Native and DevOps Engineer with 5+ years of overall experience in software delivery, automation, and software engineering, with hands-on experience designing and deploying Kubernetes-based platforms on AWS. Skilled in Kubernetes, Amazon EKS, Docker, Helm, ArgoCD, Terraform, Ansible, Jenkins, GitHub Actions, Prometheus, Grafana, and ELK. Experienced in container platform deployment, CI/CD, GitOps, Infrastructure as Code, monitoring, networking, Ingress, RBAC, scalability, high availability, and disaster recovery. Strong hands-on problem-solving mindset with a focus on building secure, automated, scalable, and reliable cloud-native platforms.

Technical Skills

Kubernetes & Container Platforms: Kubernetes, Amazon EKS, Docker, Docker Compose, Kubernetes Administration, Cluster Architecture, Workloads, Scheduling, Services, Networking, Ingress, Storage, RBAC, Security, Troubleshooting, Scaling, HPA

Kubernetes Concepts: RBAC, Namespaces, Pods, Deployments, Services, Ingress, ConfigMaps, Secrets, PV/PVC, Storage, Probes, Resource Management, LimitRanges, HPA, PDB, CRDs

Kubernetes Ecosystem & GitOps: Helm, ArgoCD, GitOps, Prometheus, Grafana, ELK Stack

Cloud & Infrastructure: AWS (EKS, EC2, VPC, IAM, S3, ECR, Lambda, EventBridge, DynamoDB), High Availability, Load Balancing, Multi-AZ Architecture

Infrastructure as Code & Automation: Terraform, Ansible, Infrastructure as Code (IaC), Python, Bash

CI/CD & DevSecOps: Jenkins, GitHub Actions, GitLab, Git, Maven, SonarQube, Trivy

Networking & Security: TCP/IP, DNS, HTTP/HTTPS, TLS/SSL, Load Balancing, AWS IAM, RBAC, Least-Privilege Access

Programming: Python, Java, Bash, Boto3

Projects

Production-Grade Microservices Platform on AWS EKS

May 2026

- Provisioned highly available cloud infrastructure using **Terraform**, including a multi-AZ VPC, Amazon EKS, IAM configuration, networking, and remote state management using S3 and DynamoDB.
- Designed and deployed containerized microservices on **Amazon EKS**, working with Kubernetes workloads, Deployments, Services, namespaces, networking, Ingress, TLS, and Horizontal Pod Autoscaler (HPA).
- Implemented automated **CI/CD pipelines using Jenkins** for application builds, quality validation, container image publishing, vulnerability scanning, and automated Kubernetes deployments using SonarQube, Trivy, and Amazon ECR.
- Implemented **GitOps-based deployment workflows using ArgoCD** and worked with **Helm** for packaging and deploying Kubernetes applications.
- Configured Kubernetes access controls and cloud permissions using **RBAC and AWS IAM**, following secure access and least-privilege principles.
- Implemented platform observability using **Prometheus and Grafana** and configured **Velero** backups to support Kubernetes workload recovery and improve platform resilience.

AWS Cost Optimization Automation

Jun 2026

- Contributed to **CI/CD and release automation** by configuring and maintaining Jenkins pipelines for application builds, validation, and deployment workflows.
- Built and containerized application components using **Docker** and published container images to **Amazon ECR** for deployment on Kubernetes/Amazon EKS.
- Collaborated with DevOps and backend teams to support containerized application deployments, pipeline validation, release activities, and production issue investigation.
- Investigated application and deployment issues through log analysis and root cause investigation across cloud-connected systems, supporting reliable software delivery.

Experience

Smartfrog Services GmbH

Jan 2026 – Present

QA Engineer I

Berlin, Germany

- * Contributed to **CI/CD and release automation** by configuring and maintaining Jenkins pipelines for application build, validation, and deployment workflows.
- * Built and containerized microservices using **Docker** and published container images to Amazon ECR for deployment on **Kubernetes/Amazon EKS**.
- * Collaborated with DevOps and backend teams to support containerized application deployments, release activities, pipeline validation, and production issue investigation.
- * Participated in troubleshooting application and deployment issues through log analysis and root cause investigation across cloud-connected systems.
- * Supported reliable software delivery by validating builds, deployments, and production releases in CI-driven environments.

Vtiger Systems India Pvt. Ltd.

Aug 2022 – May 2025

Senior QA Automation Engineer

Bengaluru, India

- Managed and optimized test environments, maintaining 99% availability for automated and manual validation workflows.
- Built and maintained Selenium-based automation frameworks, increasing test coverage by 30% and reducing regression cycle time.
- Analyzed automated test reports, application issues, and release failures while collaborating with engineering teams to improve release readiness, software delivery processes, and troubleshooting efficiency.

Appright Software Solutions Pvt Ltd.

Oct 2020 – Jul 2022

Quality Analyst

Bengaluru, India

- Designed and executed functional, regression, UI, and exploratory testing strategies across software releases.
- Reduced regression testing time by 40% through early automation adoption and structured test documentation.

Education

University of Europe for applied science

Potsdam, Germany

Master of Science (M.Sc), Software Engineering

Sep 2025 – Aug 2026

Visvesvaraya Technological University

Belagavi, India

B.E. Electronics & Communication Engineering

Aug 2015 – Aug 2019

Certifications

Advanced Certification in Cloud Computing & DevOps

IIT Roorkee

Certificate ID: IPTIH2412265
